

POLYNESIAN VOYAGING SOCIETY

WILLIAMS

BOX 19000-A / HONOLULU HAWAII 96817

February 17, 1987

Hon. Jacques Teuira
Government of French Polynesia
Papeete, Tahiti
French Polynesia

Dear President,

After two years and traveling 13,000 miles, the Hokule'a now rests in the village of Tautira on the island of Tahiti.

On March 28, 1987, ceremonies and a dedication of a Hokule'a monument by the Municipal Government of Papeete will launch the double-hull canoe on its final return voyage to Hawaii. The sailplan calls for the Hokule'a to sail March 29th from Papeete to Rangiroa, then to Nuku Hiva with an approximate arrival date of May 23rd at Kualoa, Oahu.

Our cousins in Polynesia--the traditional leaders, governments and people--are an integral part of the Hokule'a's endeavors. We could not have come this far without your participation, cooperation and goodwill.

The Polynesian Voyaging Society wishes to pay tribute to each Pacific island nation that participated in the Hokule'a's mission. Therefore, we are nominating an individual from each participating Polynesian nation to be a crewmember on the last leg--Rangiroa to Nuku Hiva to Hawaii. French Polynesia's candidate is Puaniho Tauotaha of Tautira, Tahiti.

Plans are underway for two days of welcome home ceremonies and festivities which will highlight the Voyage of Rediscovery and the human attainments of its crewmembers. Participating dignitaries include the Governor of Hawaii, Pacific island leaders and other Hawaii government officials. There will be television coverage by four local networks. The Polynesian Voyaging Society will provide accommodations and transportation for Puaniho while he participates in this historical event.

VOYAGE OF REDISCOVERY

PRE-ALGEBRA

Solve & Check:

1. $3A - 27 = -33$

2. $2x - 24 = -28$

3. $-3x - 21 = 3$

4. $-6x - 15 = 9$

5. $-4a - 2 = -10$

6. $6x - 7 = 4x + 5$

7. $-3x - 23 = 1 - x$

8. $9x - 4 = 3x + 2$

9. $2(m + 6) = -4(m + 3)$

10. $2(B - 6) = -4(B - 3)$

11. $-2(2 + 2y) = 4(y - 2)$

12. $3(R - 1) = -(6 - 2R)$

We trust this nomination meets with your approval and that your government is able to endorse this once-in-a-lifetime event. The Hokule'a is a symbol that belongs to all of Polynesia. Puaniho's participation is important. We anticipate you perceive our efforts worthy of your continuing support.

Lt. Governor Eni Hunkin
Territorial Government of American Samoa
Pago Pago, American Samoa

Dear Eni,

Greetings from Hawaii.

After two years and traveling 13,000 miles, the Hokule'a now rests in the village of Tautira on the island of Tahiti.

On March 28, 1987, ceremonies and a dedication of a Hokule'a monument by the Municipal Government of Papeete will launch the double-hull canoe on its final return voyage to Hawaii. The sailplan calls for the Hokule'a to sail March 29th from Papeete to Rangiroa, then to Nuku Hiva with an approximate arrival date of May 23rd at Kualoa, Oahu.

Plans are underway for two days of welcome home ceremonies and festivities which will highlight the Voyage of Rediscovery and the human attainments of its crewmembers.

Our cousins in Polynesia--the traditional leaders, governments and people--are an integral part of the Hokule'a's endeavors. We could not have come this far without your participation, cooperation and goodwill. The Welcome Home Committee of The Polynesian Voyaging Society is including guests from Pacific island nations visited by the Hokule'a to be present at the arrival ceremonies. Participating dignitaries include the Governor of Hawaii, Pacific island leaders and Hawaii government officials.

In addition to being a crewmember, the Polynesian Voyaging Society cordially extends an invitation for you to participate in the Hokule'a celebrations by representing the government leaders of Polynesia. Along with key dignitaries, we request you give a speech that symbolizes the impact between the Hokule'a's mission and the Pacific island nations.

We trust this invitation meets with your approval and that your government is able to endorse this once-in-a-lifetime event. The Hokule'a is a symbol that belongs to all of Polynesia. Your presence is important. We anticipate you perceive our efforts worthy of your continuing support.

Sincerely,

Myron B. Thompson

Mr. Tupi Puriri
Chairman
Waitangi Marae
P.O. Box 198
Paikia, New Zealand

Dear Tupi,

After two years and traveling 13,000 miles, the Hokule'a now rests in the village of Tautira on the island of Tahiti.

On March 28, 1987, ceremonies and a dedication of a Hokule'a monument by the Municipal Government of Papeete will launch the double-hull canoe on its final return voyage to Hawaii. The sailplan calls for the Hokule'a to sail March 29th from Papeete to Rangiroa, then to Nuku Hiva with an approximate arrival date of May 23rd at Kualoa, Oahu.

Our cousins in Aotearoa--the traditional leaders, the government and the people--are an integral part of the Hokule'a's endeavors. We could not have come this far without your participation, cooperation and goodwill.

The Polynesian Voyaging Society wishes to pay tribute to each Pacific island nation that participated in the Hokule'a's mission. Therefore, we are nominating an individual from each participating Polynesian nation to be a crewmember on the last leg--Rangiroa to Nuku Hiva to Hawaii. The Aotearoa candidate is Stanley Conrad of Tai Tokerau. The Polynesian Voyaging Society will provide accommodations and transportation for Stanley while he participates in this historical event.

Plans are underway for two days of welcome home ceremonies and festivities which will highlight the Voyage of Rediscovery and the human attainments of its crewmembers. Participating dignitaries include the Governor of Hawaii, Pacific island leaders and other Hawaii government officials. There will be television coverage by four local networks.

VOYAGE OF REDISCOVERY

We especially wish for the Waitangi Committee and its supporters who assisted with the Hokule'a to be present in Hawaii when the double-hull canoe makes landfall. Unfortunately our resources do not allow us to subsidize air fares and accommodations. However, if you wish, we will seek out favorable room rates with our local tourist vendors. Of course, you are our honored guests at the ceremonies, festivities and feasts.

We trust this nomination and invitation meets with your approval and that your committee is able to endorse this once-in-a-lifetime event. The Hokule'a is a symbol that belongs to all of Polynesia. Stanley Conrad's participation is important. Waitangi's presence is significant. We anticipate you perceive our efforts worthy of your continuing support.

POLYNESIAN VOYAGING SOCIETY

BOX 19000-A / HONOLULU / HAWAII 96817

Monsieur Marere
Marie de Rangiroa

le 4 fevrier

Monsieur le Maire:

A la suite d'un voyage de 21.000 kilometres durant deux ans, Hokule'a se trouve maintenant a Tahiti, la source de son inspiration.

Depuis 1976 le gouvernement territorial de la Polynesie francaise s'engage pour assurer la reussite de la Polynesian Voyaging Society. On n'aurait pas pu y arriver sans votre appui et votre bon volonte.

Le depart de Hokule'a de Tahiti commencera son voyage d'adieu. Des son arrivee a Hawaii on prevoit son entree dans un musee maritime.

La Polynesian Voyaging Society demande respectueusement la permission pour Hokule'a de faire escale, a Rangiroa. Etant consciet des contradictionna meteorologiques, nous proposons ces dates suivantes:

le 26 mars - depart de Tautira vers Papeete
le 29 mars - depart de Papeete vers Rangiroa
le 4 avril - depart de Rangiroa vers Nuku Hiva
le 30 avril - depart de Nuku Hiva vers Hawaii

On fera de son mieux pour que Hokule'a arrive a Nuku Hiva. Cependant, si les elements climatiques continuait a empecher le voyage de Hokule'a de l'ouest en est de Rangiroa a Nuku Hiva, le pilote aurait le droit de proceder directement a Hawaii en evitant Nuku Hiva.

Nous envisageons l'arrivee de l'equipage de Hokule'a et du personnel de la Polynesian Voyaging Society sur des vols divers au courant du mois de mars. Nous nous chargerons de vous communiquer des indications necessaires en vous demandant de les transmettre aux bureaux gouvernementaux interresses.

Il existe, en outre, un projet pour envoyer un groupe d'etudiants des Kamehameha Schools. Ils presenteraient un programme de musique et de danses dans le but d'amuser leurs amis tahitiens, et pour participer au depart definitif de Hokule'a.

Hokule'a reste un symbole qui appartient a toute la Polynesie. Nous esperons que vous pourrez soutenir nos efforts dans l'avenir.

Veuillez agreer, Monsieur l'Haut-Commissaire, a l'expression de mes sentiments les plus distingues.

POLYNESIAN VOYAGING SOCIETY

BOX 19000-A / HONOLULU / HAWAII 96819

Feb 18, 1987

Monsieur Pierre Angeli
Haut-Commissaire de la Republique En Polynésie Française
Papeete, Tahiti, P.F.

Monsieur L'Haut-Commissaire:

The Hokule'a is currently dry docked at Tautira, Tahiti awaiting repairs and refitting before being placed in the water for its departure March 26, 1987 for Papeete. The Hokule'a will sail Papeete to Rangiroa on March 29 and then on to Nuku Hiva and Hawaii.

The Hokulea crew members are arriving in Tahiti from Honolulu in four groups, on UTA, March 9, 16, and 23 (see attached list). The first group will be repairing the canoe, the second group will join the first group to assist in final preparations. The third group consists of crew members, officials and supporters. The fourth is more crew members.

ONE WAY TICKETS

We respectfully ask for your consideration to allow Hokule'a crew members to gain entry into Tahiti on a one way ticket. Crewmembers (designated by *) will travel Rangiroa, Nuku Hiva to Honolulu and do not need a return ticket. In the event any of these crewmembers do not sail on the Hokule'a, the Polynesian Voyaging Society will pay their air fare to their country of origin.

CREWMEMBERS REPRESENTING PACIFIC ISLANDS

There are six crewmembers who are representing Polynesian nations who have participated in the Hokule'a project. They are on the last leg - Rangiroa, Nuku Hiva to Hawaii and are entering Tahiti on a one-way ticket. The names of these crew members are:

- . Puaniho Tauotaha, Tahiti, French citizen
- . Tava Taupu, Marquesas, French citizen living in Hawaii
- . Eni Hunkin, Lt. Gov of American Samoa, U.S. citizen
- . Tua Pittman, Rarotonga, Cook Islands, N.Z. citizen
- . Stanley Conrad, New Zealand, N.Z. citizen
- . Sione Fangatua Taupeamuhu, Tongatapu, Tongan citizen

VOYAGE OF REDISCOVERY

TELEVISION PARTICIPANTS

Two crew members, Elisa Yadao & Cliff Watson are Hawaii's KGMB-TV film production personnel and will be documenting Hokule'a activities and will be on the final legs - Papeete, Rangiroa, Muku Hiva & Hawaii. They have made the necessary carnet arrangements for their film equipment.

Larry Loganbill, also a T.V. production personnel, is with the Kamehameha Schools and is filming Hokule'a activities, performances by the Kamehameha Schools dancers and singers and will be on the leg - Tautira to Papeete. He will bring with him his own video-equipment for educational purposes.

ESCORT BOAT

The Dorcas, our escort boat, is presently docked in Papeete. We will be sending to Tahiti four crewmembers whose names are to be announced.

The Kamehameha Schools singers and dancers will be arriving in Tahiti, March 23rd to perform public concerts as guests of the Territorial Government of French Polynesia and to participate in the Hokule'a activities.

Any courtesies extended to the officials, crewmembers and supporters of the Hokule'a project is appreciated.

Sincerely,

Myron E. Thompson

KAMEHAMEHA SECONDARY SCHOOL
Kapāemā Heights
Honolulu, Hawaii 96817
Telephone (808) 842-8350

KAMEHAMEHA SCHOOLS / BERNICE PAUHI BISHOP ESTATE

Monsieur Jacques Teheura
Ministre de l'Education et de la Culture
Gouvernement de la Polynésie française
Papeete, Polynésie française

le 23 février

Monsieur le Ministre:

Aloha! Nous sommes bien contents d'avoir reçu votre lettre du 4 février 1987, qui invite nos danseurs et nos chanteurs des Kamehameha Schools de se présenter devant des citoyens de la Polynésie française du 23 au 30 mars.

Les Kamehameha Schools, fondées par la princesse Bernice Pauhi Bishop sont l'héritage des enfants indigènes de Hawaii. Aujourd'hui Kamehameha Schools organisent un programme de l'enseignement général pour à peu près 3000 étudiants.

Il est important que nos étudiants établissent des liens avec le peuple indigène de la Polynésie française. Les Tahitiens et les Hawaïens partagent une seule culture, une tradition, une langue et une histoire qui remontent à l'idée de Hawaiki, que l'on croit aujourd'hui Raiatea. De plus, des traces archéologiques donnent des indications que la première vague d'arrivées à Hawaii consistait des voyageurs des Iles Marquises.

Les Kamehameha Schools sont fières d'accepter votre invitation, étant conscientes que celle-ci rendra possible un occasion majeur pour des fils et des filles de Kamehameha de se présenter en Polynésie française. Avec l'appui et la collaboration de votre administration nos étudiants auront la possibilité de mieux comprendre le développement de notre culture hawaïenne de ses origines, ces aïeux, le peuple indigène de la Polynésie française.

Nous continuerons à communiquer avec M. Gerald Cowan du Département des Evénements et des Festivités, OTAC en ce qui concerne les détails de notre visite.

Les étudiants anticipent l'établissement des liens inter-culturels avec des compatriotes, ces liens qui évoqueront la fierté et le compréhension de notre héritage polynésien partagé.

Veuillez agréer, Monsieur le Ministre, à l'expression de mes sentiments les plus distingués,

cc: M. G. Cowan

Mrs. Waihe'e
Executive Chambers
State of Hawaii
Honolulu, Hawaii 96813

Dear Governor Waihe'e:

After two years and traveling 13,000 miles, the Hokule'a now rests on the island of Tahiti anticipating its final journey to Hawaii.

On March 28, 1987, ceremonies and a dedication of a Hokule'a monument by the Municipal Government of Papeete will launch the double-hulled canoe on its return voyage to Hawaii. The sail plan calls for the Hokule'a to sail March 29th from Papeete to Rangiroa, weather permitting then to Nuku Hiva with an approximate arrival date of May 23rd at Kualoa, Oahu.

Plans are underway for two days of welcome home ceremonies and festivities which will highlight the Voyage of Rediscovery and the human attainments of its crew members.

The Polynesian Voyaging Society invites the Governor and Mrs. Waihe'e to participate in these ceremonies.

At the Welcome Home Ceremonies 12:00 noon, Saturday, March 23, 1987, Kualoa Park, Oahu, the Governor is invited to deliver a keynote address. The days program will commence at 10:00 a.m. with the arrival of the Hokule'a followed by traditional, formal ceremonies and entertainment. Plans call for a live radio broadcast and television coverage. Pacific Island dignitaries and other local officials will share the podium with you.

Solar panels = 410 cm.

Outrigger extension at nav. platform for net = 170 cm.

(use ?? horiz. piece ??? : 4x4)

All deck rails and posts = o.k.

Post for nav. platform = o.k.

2 checked all the way thru

1. Sail on port hull forward one of two on nav.

platform is weak, seems to have dry rot —

Wally check

* All deck rails and posts out board ??? of iakos, mst
steps, radio box, cross beam, need oil & varnish

Outside walking platform:

2 x 12 @ front dbl. iako to first single

(2) 2 x 6 on top of iakos from No. 2 to nav. perch post

2 x 10 from nav. perch post to last iako

Deck cont. =>

1. Net bow & stern = o.k.

2. 2 ??? for mizzen sheets, re-tie on back side of cross
beam so cannot rip sails

3.

(drawing)

- 3. Same for ??? on rail P& stb.
put outboard of rail
- 4. Change nav. platforms=

Inside hull:

P & stb

Visually =

posts, wai, iako, p.u.c. & caps,
deck compartments, hatch walls,
hatch covers, epoxy = all o.k.

??? ???

Port = #7 compartment)

) → Jim

Stb. - # 3, 4, 7 compartments)

4.

Decks

Use better line to secure hatch - 1/4" dacron

Decks may be slippery →

Also ??? may be slippery forward

* ??? of like termite eggs in top of deck in stb. hull

But Puaniho and Mate say (??) may have come from

when they cut coco trees for shed → None in port hull.

Seen one termite on my arm

Post in compartment #2, compartment stb.

??? old termite holes and tunnels but no eggs, no termites

CAROLYN K. IMAMURA

Honolulu, HI 96826

April 22, 1987

MR. ROBERT MALUWEIRANG
c/o Micronesian Maritime Authority
Federated States of Micronesia
Pohnpei, ECI 96941

Dear Robert,

I was happy that I was able to talk with you today about arrangements for Mau. The following are his travel arrangements:

5/5	Leave Pohnpei	at 7:30 p.m.	(Continental #960)
5/5	Arrive Honolulu	at 6:60 a.m.	

His return is an open booking. The ticket should be arriving in Pohnpei, possibly even before you receive this letter. I have asked that Air Mike (Pohnpei) notify you upon arrival of the pre-paid ticket, but you might want to check with them.

Again, let me go over the documents that you should make sure that Mau has with him so that Immigration in Honolulu does not detain him, as has happened in the past:

1. Valid FSM passport;
2. Copy of UH President's letter (copy enclosed);
3. Copy of PVS letter from Myron Thompson (copy enclosed);
4. Any FSM immigration documents, as available or necessary for his return (just in case).

As I am writing this letter, I hear my fax machine and I hope that the acceptance letter is on the other end. Since the University does have certain types of activities connected with the conferring of honorary degrees which take some time to plan, I think that it would be appropriate to let them know as soon as possible. (Also, one of my friends is on the Board of Regents. Since he knows that Pinky has asked me to followup, he is getting a bit impatient with me, too. Most of it is that the University is quite excited about the presentation; they just want to "do it right".)

If you have any questions, you can call me at (808) 523-9325/work or (808) [redacted] /home; you can call collect (I know how difficult your telecommunications people are about long distance charges.)

Hope things are going well with you. It was good to hear your voice since I have not run into you on airplanes in a while. Last I heard from Henry in Saipan, he was doing well teaching school.

With aloha,

cc: ✓ [redacted]
Henry Yarofalpiy

April 6, 1987

Mr. Myron Thompson
Polynesian Voyaging Society
P. O. Box 19000A
Honolulu, HI 96817

Dear Pinky,

Shipments to Rangiroom

Two boxes. See letter to Capt. Jim Heumann & Mr. Bill Kepner on S/V Dorcas.

The following items were given to Laura Thompson on Saturday, April 4th, 1987.

- 1 ACR Strobe Light. She was to purchase one 6 volt lantern battery
- 1 Aqua Signal Masthead light, tri color, for Hokulea
- 1 Morad, M900 antenna mount for Hokulea SSB long range antenna
- 5 Merinetic circuit breakers, for battery compartment, Hokulea

Give all to Mike Tongg, He knows what to do with them.

Please make a radio schedule with Mike and Bill (Dorcas) at a time when you return with WLX Honolulu (Hawaii Tug & Barge). I have no idea when we should start up these evening schedules with WLX.

Please advise.

Good luck, and I hope, not too many problems

Aloha, Len

April 6, 1987

Capt. Jim Heumann
Mr. Bill Kepner
S/V Dorcas
Rangiroa, Tuamotus
FRENCH POLYNESIA

Dear people,

Enclosed in two separate boxes are the following:

- Box one New Newmar ABC-12 35 12 volt automatic battery charger
- Box two One Dentron automatic antenna tuner with two patch cords
and one operators manual
Three Silicone Rectifier Diodes for your generator
One whisker Stylus for the Furuno Weather Fax, See Denny.

All of these items are being charged to the Dorcas Account via PVS.

The antenna tuner is on rental at \$60.00 per month. Please make sure that it and the Magnavox Sat Nav, compass and antenna are returned to KEMS upon returning to Honolulu.

Hope all this helps you in your efforts.

Let me know via amateur "Ham" radio when you are able to resume the 12 MHz schedules with WLX-321 Honolulu.

Good luck and good sailing, 73

THANKYOU, FOR YOUR BUSINESS...NANCY, TRAVEL PARTNERS

Looking for Land

Looking for land *once reach 20 1/2 deg. North

Situation #1

- 1) available clues to hold course to find land
- * steer due west during day and night
- * allow stars to guide course within the land cone
- * hold line if exactly on line
- * deviate north or south if needed to get back to line as long as you are in the cone.
- * stars show you are out of cone, stop go close to wind, get back in cone then proceed as follows:
- * when changing course deviation it should only be between La or Aina to stay in the cone

Or combo of #2 - just deviation north or south so as to get back to cone

Situation #2

- 2) you are within the cone but no clues available to know if you will remain in cone
- * Tack. (given regular trades east to N.E.)
Starboard tack should be as close to north as possible
- * But tack should be 11 west deviation from the line held on the starboard tack. (Example: hold N.W. Haka - Point back would be Hema)
- * Tack to 22 N then to 19 N given a tack would take 200 miles a 11 deviation would be 40 miles waiting for full tack if it took 3 days to go full 40 miles tack and on 45 miles for current = 85 miles.

Situation #3

- If no clues to say you are within the cone of the land
- not sure at the moment that you are within the cone
- * if you are up wind of cone, "hove to" and wait for the clues
- * south of land tack north estimate you up wind of 20 line and "hove to"
- * sail on a line that would be a particular sailing direction then track to its reciprocal (example) go Akau then back to Hema - (Haka N.W. to Haka S.E.)
But dead reckon yourself to be within the cone

*** This situation would require you to wait for the land clues

****Whenever in doubt, "Tack for land"

MAHABREAKDOWN

Marquesas - Hawaii (Sail Break down)

Basic Sail plan

- 1) Marquesas to 4 degrees N = Course due with 780 mi @ 120/day = 6.5 days
- 2) 4 degrees N to 9 degrees N Doldrum = course due with 300 mi @ 150 mi/day = 6 days
- 3) 9 degrees N to 20 degrees N = Course 57 degrees N of West 780 mi @ 120 mi/day = 6.5 days with current set of 10 mi/day West for area in 1 and 3 will be 13 days = 130 mi West
- 4) @ Lat. of Hawaii 20 degrees N to ? = 260 mi @ 120 mi/day = 2.3 days

Total = 21.3 days

* Key is Full Moon May 23, latest date to be at latitude of Hawaii at May 24th

MAHA-HISTORICAL

Historical Significance (Mar.-Hawaii)

Archaeological evidence strongly indicates that the first people to colonize Hawaii were from the Marquesas. Which makes this leg very important. There is no existing evidence that these earliest arrivals went back to their homeland. Suggesting there was no two way voyaging. Some could argue that since no two way voyaging, that the initial leg to Hawaii may have been accomplished by sailing without navigational technique. But my contention is that most likely they had the means to hold a course and direction.

1. Hawaii is first too far away to sail without at least holding a desired course line, requiring the ability to know at a minimum of How to Hold Direction.
2. A return trip from Hawaii to the Marquesas given any type of trade wind set up could not be done on one tack. To tack to the Marquesas would take a very long time.
3. There is evidence Marquesas people have sailed to many parts of the Pacific, in that sailing ability the minimum of being able to at least hold direction was probably necessary.

Navigation Course—

All navigational information will be put in the course line.
 Course Line - will be the reference that we sail by the line that we orientate ourselves at sea.
 This is a long voyage of basically one tack. (Unlike from Tahiti to Marquesas)

Direction—

Use all clues day and night
 Most difficult task of getting thru the doldrum area. Max. cloud area
 Fatigue is a factor (length of voyage)
 1. keep now. in frustration stored over long
 2.

MARQUESAS to
 HAWAII

etermine as we keep reference to course line
 formation to target the Hawaiian Islands
 ne star clue for latitude of Hawaii, since it is

the most accurate one for the latitude of Hawaii. Hope it is not too cloudy.

Targeting—

Open ocean passage, once we leave the Marquesas—we should not see any other island but the Hawaiian Islands.

Hawaii lacks in numbers of Manuku and Noio birds which we use to target the Islands. So most likely we will use the extreme height of the Big Islands or Maui as our target.

Weather—

Basic tradewind sailing—the months picked should be free of any low pressure systems in both the northern and southern hemisphere.

Doldrums—may be extensive or it may not. Spring months the doldrum tend to be less extensive than the summer and winter months.

But Doldrums conditions present two things—

1. Visually the most dynamic area in the tropical Pacific
2. It is the hardest place to navigate, it is here where we should record the most.

Storms—

These months are the best to have the lowest possibility of tropical cyclones in both northern & southern hemispheres. Maybe some powerful squalls in the doldrums that we will need to employ storm sailing procedures.

Sailing—

All facets of sailing Hokule'a on a long voyage.

mechanics of sailing & steering

watch duties & responsibilities for cleaning

maintenance

safety procedures

basic routines of life at sea, adaptation to a long passage

March 5, 1987

To Board of Directors
Polynesian Voyaging Society

From Len Withington, Jr.
Hokule'a Committee
Communications

Subject: Contingency Fund for anticipated Expenses for the S/V Dorcas

I propose setting up a budgetary fund (Amount to be discussed) for Dorcas last minute expenses.

Discussion: After meeting with Peggy, on her recent trip. Meeting with Capt. Jim Heumann, Capt. of Dorcas, and Meeting with Tony Richard of SeaTronics I find that there will be some expenses incurred between now and her arrival in Honolulu.

If the funds could be budgeted, and an approval method established, I feel things will go smoothly.

Action. Set up amount
Set up approval procedures
Set up cash dispersal procedures

Budge as I see it.

Items required for Voyage: Some items already paid for
Batteries, Light bulbs, Paper for Wx Fax

Family Items:

Repair Items:

Freight to and from Hawaii \$200.00
Repair of Sat Nav - SSB - Radar - Chargers
Alternators \$600.00

Canoe Loaded with Provisions for a 41 day sail

1/6/87

Dear Pinky / Nainoa

My thanks to you and the Crew Selection Comm. for giving me another opportunity to sail on the Hokulua. I certainly do accept your invitation and look forward to the sail from Rangiroa to Nuku Hina.

I would like to take this opportunity to propose a physician / crewman for the short leg from Papeete to Rangiroa for your and the committee's consideration. He is Dr. Peter Caldwell. I'm assuming Pat Aie will be sailing too but for several reasons I think Pete may be a valuable addition. He has been a member of the PVS from its inception and has a strong interest in all the Hokulua stands for. He has been to the Societies and Tuamotus some 4-5 times since his first visit in 1980 to see the Hokulua off on its return to Hawaii. He has some familiarity with Taupia & Rangiroa and served as physician on one of Dr. Simota's expeditions back to his digs on Huahine.

Pete is an athlete and sports medicine enthusiast and is also an excellent photographer. Limited sailing experience but surfs and dives to some extent.

Personality: laid back, no airs, eager to learn. Has made many friends easily in Tahiti.

Aaron Young - one of his very good friends - can probably attest to his ability to get along well with people of any kind. Pat also knows him. He should have the time to spend helping refurbish Mokuleia in Tautira.

I know the crew list is tight and I certainly wouldn't have any hard feelings if you could not take him, but for the reasons cited above I think ☐ Pete Caldwell is a good candidate.

Let me know what you think

Sincerely,
Nate

January 3, 1987

To: Marlene
From: P.T.

Note to Nate: Sail from Rangiroa to Nuku Hiva--if he can't make it no problem Pat will be on board. (I attached this note to his letter.)

Note--The following media people will be placed as required after discussion between Nainoa and Elisa.

Elisa
Cliff
Larry Loganbill
Australian cameraman

Tried to locate you on Fri--no luck--leaving tonight for D.C.

Madeline has or is about to send out the letters to the prospective crew members. Enclosed are copies of the letters sent. The master file of the crew is to be kept strictly confidential until after we have received a reply from each person and a final list is confirmed by the selection committee.

I will be back next weekend. I would like a board meeting on Jan. 21 @ 5 p.m. In the meantime--if Moku is ready the executive committee can vote on the Homecoming plan. This plan needs to get to OHA as well.

Also, I would like a meeting with Harry, Wally, Nainoa and Len Withington and Bob Worthington on next weekend at my place for 1 1/2 hours at the most.

Will call on the 9th.

Call Randy Fong--ask him re status of theme.

TO: Invited Crew Members

FROM: P.T.

SUBJECT: Crew Selection criteria for the 3 sailing legs between
Tahiti to Rangiroa - Rangiroa to Nuku Hiva -
Nuku Hiva to Hawaii

Based on our sailing and documentary requirements we have
chosen crew members to fulfill the following performance
requirements:

- Navigation and overall sailing coordination,
- Back up navigation,
- Watch crew coordination,
- Repair and maintenance coordination,
- Provisions and equipment coordination
- Medical care provision,
- Galley functions,
- Documentation, writing and/or visual.

From past experience, we know that we must have between
nine and ten crew members who have had open ocean long
distance sailing experience on Hokule'a.

For the sail from the Marquesas to Hawaii, in appreciation for
the extensive kokua by the Islanders visited, and in respect to their
and our coming together as one culturally, we will have at least 1
crew member from each island group visited. All other less

77

experienced crew members have been chosen from review of their past performance with the P.V.S.

It is also important to note--that all chosen crew members must be physically fit. As important and needing to be said again --All crew members must be fully committed to the requirements of these sails and the overall objectives of the P.V.S. It is expected that invitees, who have personal concerns which could interfere with his or/her committment to the requirements of this sail, will not accept this invitation.

January 3, 1987

Dear Abe:

The Polynesian Voyaging Society would be most honored if you would be willing to sail on Hokule'a from Tautira to Papeete and to represent Hawaii and the Polynesian Voyaging Society at ceremonies to be held on March 29, 1987. The Tahitian government is acknowledging the Voyage of Rediscovery's importance by designating that part of the Papeete Harbor shoreline on which Hokule'a landed in 1976 "Hokule'a Beach". We can think of no one more appropriate than you to be our responder at those ceremonies. They are scheduled to take place following church services for crew and supporters that Sunday morning.

P.V.S. will provide air transportation on a S.P.I.A. flight leaving Honolulu on March 26th and returning on March 30th. P.V.S. will also provide housing and food for you. The food, for the most part, will be from Hokule'a supplies for two reasons: to minimize cost and to minimize intestinal difficulties.

Abe, P.V.S. and our family deeply appreciates your continued interest and participation in our overall program and we are hoping very much that you will have the time and will want to join us at yet another of Hokule'a's history making ceremonies. I will be away until January 19th so please let Marlene know of your decision by the middle of January. She can be reached at 955-7878.

Aloha nui loa to you,

MBT

P.S. For your information I enclose the proposed sail plan for the last segments of the Voyage of Rediscovery.

7A

January 3, 1987

Dear Will, Cary:

P.V.S. invites you to be a crew member on Hokule'a on the sail from Tau Tira to Rangiroa. Please review the attached memo carefully for the details of your portion of the sail as well as the basic objectives of these sails. If you are able to be a crew member, plan to leave Hawaii on March 23rd and return to Hawaii no later than April 6th.

As I will be away for the next two weeks, please call Marlene at 955-7878 regarding your decision.

Our Public Information Committee will make an official announcement in March. Please keep this invitation and your decision confidential to your family, your employer and P.V.S. until that time.

Finally, you will note that our cost is lean but heavy. We need your financial kokua though it is not required. If it is possible, please make a donation to Hokule'a's last segments of its "Voyage of Rediscovery" either as a one time contribution or on a twelve month installment program. In addition you will need to provide your own lightweight foul weather gear and 48 qt. cooler. Other details will follow your decision.

Hoping for a "yes" from you.

Sincerely,

MBT
Co-chair,
Crew Selection Committee

50

January 3, 1987

Dear Kimo, Wally, Leon, Aaron, Chad, Harry:

P.V.S. invites you to be a crew member on Hokule'a on the sail from Tau Tira to Rangiroa to Nuku Hiva. Please review the attached memo carefully for the details of your portion of the sail as well as the basic objectives of these sails. If you are able to be a crew member, plan to leave Hawaii on March 19th and return to Hawaii no later than April 27th.

As I will be away for the next two weeks, please call Marlene at 955-7878 regarding your decision.

82

January 3, 1987

Dear Kilo, Michelle, Russell:

The Polynesian Voyaging Society invites you to sail on Hokule'a from Tautira to Papeete, Tahiti, leaving Tautira March 27. Although we would like to provide a longer sailing experience for you, our time constraints and our objective of acquiring as much "on board" documentation as possible dictates our decisions. The sail is a day sail about 40 miles long. During that sail on board video filming will take place, therefore it is important that you be in top physical shape to participate as required. Because of the length the sail, your body will probably not have time to get accustomed to the motion of the canoe. We mention this in case you have problems with seasickness.

Please review the attached memo carefully for the details of your portion of the sail. If you choose to join the crew you will leave Honolulu for Tahiti on March 19th and will return March 30th. It is possible, but remotely so, that you will be asked to participate an additional leg from Papeete to Rangiroa. In that case, your return to Honolulu will be either April 2nd or April 6th. That decision will probably not be made until the end of March.

P.V.S. will provide air transportation, housing and meals for you. It is possible that housing and meals will be on Hokule'a because meals from Hokule'a's supplies not only minimize cost, they also minimize intestinal difficulties!

You will note that our cost is lean but heavy. We need your financial kokua though it is not required. If possible, please make a donation to Hokule'a's last segments of its "Voyage of Rediscovery" either as a one time contribution or on a twelve month installment program.

Let Marlene know of your decision as soon as possible. Her telephone number at work is 955-7878.

Aloha,

MBT

87

January 4, 1987

Dear Scione:

P.V.S. invites you to be a crew member on Hokule'a on the sail from Nuku Hiva to Hawaii. Please review the attached memo carefully for the details of your portion of the sail as well as the basic objectives of these sails. If you are able to be a crew member, plan to be in Papeete, Tahiti, on May 1. You will be able to return to Tonga soon after the Hokule'a arrives in Hawaii on May 30th.

As I will be away for the next two weeks, Bob Worthington will be in touch with you.

Our Public Information Committee will make an official announcement in March. Please keep this invitation and your decision confidential to your family, your employer and P.V.S. until that time.

P.V.S. is sorry that we can offer to pay for only your airfare from and to Tonga, and housing and food. You will need to provide your own lightweight foul weather gear to keep you dry and a 48 qt. cooler. Other details will follow your decision.

Hoping for a "yes" from you.

Sincerely,

MBT
Co-chair,
Crew Selection Committee

January 4, 1987

Dear Stanley:

P.V.S. invites you to be a crew member on Hokule'a on the sail from Nuku Hiva to Hawaii. Please review the attached memo carefully for the details of your portion of the sail as well as the basic objectives of these sails. Since you are able to be a crew member, plan to be in Papeete, Tahiti, by May 1. You will be able to return to Auckland from Hawaii as soon as you desire following the arrival of Hokule'a on May 30th.

Our Public Information Committee will make an official announcement in March. Please keep this invitation and your decision confidential to your family, your employer and P.V.S. until that time.

Finally, you will note that our cost is lean but heavy. We are therefore not able to offer anything more than your airfare as well as housing and food while you are away from home. You will need to provide your own lightweight foul weather gear to keep you dry and a 48 qt. cooler. Other details will follow soon.

Hoping for a "yes" from you.

Sincerely,

MBT
Co-chair,
Crew Selection Committee

January 4, 1987

Dear Tua:

P.V.S. invites you to be a crew member on Hokule'a on the sail from Nuku Hiva to Hawaii. Please review the attached memo carefully for the details of your portion of the sail as well as the basic objectives of these sails. Since you are able to be a crew member, for now plan to be in Papeete by May 1. You will be able to return to Rarotonga from Hawaii as soon as you desire following the arrival of the canoe on May 30th.

Our Public Information Committee will make an official announcement in March. Please keep this invitation and your decision confidential to your family, your employer and P.V.S. until that time.

Finally, you will note that our cost is lean but heavy. We need your financial kokua though it is not required. It would be appreciated if S.P.I.A could provide your transportation from and to Rarotonga. P.V.S. will provide for your housing and food while you are away from home. However, you will need to provide your own lightweight foul weather gear to keep you dry and a 48 qt. cooler. Other details will follow soon.

Hoping for a "yes" from you.

Sincerely,

MBT
Co-chair,
Crew Selection Committee

January 4, 1987

Dear Eni:

P.V.S. invites you to be a crew member on Hokule'a on the sail from Nuku Hiva to Hawaii. Please review the attached memo carefully for the details of your portion of the sail as well as the basic objectives of these sails. Since you are able to be a crew member, plan to be in Papeete by May 1. You will be able to return to Samoa from Hawaii as soon as you desire following the arrival of Hokule'a on May 30th.

Our Public Information Committee will make an official announcement in March. Please keep this invitation and your decision confidential to your family, your employer and P.V.S. until that time.

Finally, P.V.S. will provide your air transportation from and to Samoa. Housing and food will be provided. Since our budget is tight, you will need to provide your own lightweight foul weather gear to keep dry and a 48 qt. cooler. Other details will follow soon.

Hoping for a "yes" from you.

Sincerely,

MBT
Co-chair,
Crew Selection Committee

TO: P.V.S. Fund Raising Committee

FROM: Myron B. Thompson

RE: Estimated Revenues - Expenses by month between Sept. '86 and Dec. '87
Revised: 10-26-86.

Month	Bal. Carried Frwd.	Revenues	Expenses	Balance Carried Forward
Sept 86	28,748	12,133	14,452	26,429
Oct	26,429	0	11,925	14,504
Nov	14,504	0	10,675	3,829
Dec	3,829	120,000	60,675	63,154
Jan 87	63,154			51,059
Feb	51,059)	0	12,095	38,964
Mar	38,964)	0	100,022	(61,058)
Apr	(61,058)	0	29,847	(90,905)
May	(90,905)	0	31,510	(122,415)
June	(122,415)	0	33,260	(155,675)
July	(155,675)	0	10,000	(165,675)
Aug	(165,675)	80,000	10,000	(95,675)
Sept	(95,675)	0	10,000	(105,675)
Oct	(105,675)	0	10,000	(115,675)
Nov	(115,675)	0	10,000	(125,675)
Dec.	(125,675)	0	10,000	(135,675)

The \$135,675 does not include costs of publications, production of curriculum and an attendant educational program nor the cost of "Welcome Home Ceremonies." I would suggest that the Research Committee include in their program the means to acquire funds for publication. In terms of curriculum development and attendant educational program, I suggest a working committee to put together a legislative package. As to the cost of the Welcome

Ceremonies, I suggest that Welcome Home Committee include a program to raise the needed funds. All fund raising projects must be coordinated with the Boards Fund raising committee.

As to the \$135,675--I refer the "How to" to the board members:

- * who wants to volunteer to raise this amount within the next 6 months?
- * who has the time to meet weekly to plan and implement.
- * who - from the community can be asked to organize & implement this program, on a one shot basis.

As starters: what about Hawaii Maritime Center and their committment for \$250,000? What about new pledges? What about Board Members making personal loans payable by P.V.S. within the next 18 months or less at the prime rate of interest? Whatever?

It is important that you come to the next meeting with your thoughts and recommendations on the matters.

Mass Sea Field
Summary

TO: P.V.S. Board of Directors
FROM: Selection Committee
RE: Reaffirmation of Prior Board Decisions regarding process of crew selection

The Board of Directors of P.V.S. established the following policies:

Criteria for crew selection:

- * Health clearance from a physician;
- * Demonstrated physical strength to perform the required duties of sailing the Hokule'a;
- * Demonstrated experience of open sea sailing on Hokule'a;
- * Demonstrated emotional stability to handle the required close quarters, close interpersonal contacts and the extreme stress encountered by having to sail under gale winds, huge swells with accompanying 4 to 6 feet wind waves being generated by gale winds blowing in the opposite direction of the 12 to 25 foot swells and other conditions!
- * Demonstrated ability to be open to learn! Note: Presently, our proven crew members today, are far more sophisticated about sailing Hokule'a than they were when they left Hawaii in July of 1985.

*get printed
copies of
copies.*

Responsibilities of the Selection Committee:

1. To select the crew members for each leg according to established criteria and specific objectives to be met. Note: The decisions of the committee are final. The committee is not required to explain to anyone as to the reasons for the committee's decisions.

TO: P.V.S. Board of Directors

papers or
copies.*

Responsibilities of the Selection Committee:

1. To select the crew members for each leg according to established criteria and specific objectives to be met. Note: The decisions of the committee are final. The committee is not required to explain to anyone as to the reasons for the committee's decisions.

We have been successful with these policies. The committee therefore request the Board's reaffirmation. Given the fact, that the committee will be announcing the crew list for the next 3 legs, I am anticipating some unhappy individuals. They may be pressuring the Board. In addition, if there are individuals associated with P.V.S. who cannot stand success, they will come forth now to attempt to prove a "Hawaiian" project cannot succeed. We don't need them!

B. Rangiroa to Marquesas (leg 2) - General Plan: April 6th - May 4th; Course: 44 T 580 mi. to Elao

1. Summary of Considerations related to this leg:

a. Historical;

Strong archaeological evidence indicates that the Marquesas may have been the first inhabited island group after the Polynesians expanded out of the Samoa-Tonga area. This suggests the Marquesans to be the oldest inhabitants of the eastern polynesian islands.

A sail leg from the Marquesas to the Tuamotus could possibly suggest the expansion of the Polynesians out of the Marquesas into the Tuamotus and further outward. But we are going the other way. I am not sure that this leg, in the manner in which we are sailing, relates to the basic historical movement of the Polynesians. May be good to leave the question with Ben Finney, Yoshi Sinoto, etc.

2. Sail Plan Considerations;

There is a time constraint. We need to be in Hawaii by June 1st:

- a. To avoid the central north Pacific summer hurricane season;
- b. Because by June 10, the southern cross will not be available to use to target the latitude of the Hawaiian Islands.

The departure date out of Tahiti must be maintained. An earlier departure date will bring us into the southern hemisphere's hurricane season.

We therefore have the month of April to reach the Marquesas.

I chose to depart from Rangiroa because of the approach to the Tuamotus from Tahiti. It is dangerous to approach the Tuamotus from Tahiti any farther east than Rangiroa. It is too wide to sail through in daylight hours, and too dangerous to sail at night.

So we have an upwind leg with approximately one month to complete. I am not sure Hokule'a could tack to the Marquesas in a month with the possibility of light easterlies or northeasterlies. No matter what, to have to

tack to the Marquesas would be a long, difficult trip. You would not want to beat on yourself with such difficulty, knowing that right after that you have to sail 2,000 miles to Hawaii.

We will wait in Rangiroa until the trade winds shift south of east to a position that will allow Hokule'a a chance to sail to the Marquesas without tacking.

There is an option to sail to another island called Manihi which is 95 miles east northeast of Rangiroa. From here we would be in a better position geographically to sail to the Marquesas.

If we sail straight from Rangiroa to the Marquesas it may only take 4 to 5 days. It depends if the winds we leave on stay favorable throughout the whole passage.

b. Navigation -

1. Course strategy - will develop two courses
 - a. A straight course given the wind is favorable to make landfall in one tack.

- b. To tack to Marquesas.

2. Direction

Leg should be considered extensive—will use all of the clues for both day and night direction holding

3. Latitude

Plays very important role in targeting the islands especially if we need to approach from the west against the trades. Main stars will be thoroughly studied before we leave Hawaii. We may need to tack in the latitude parameters to gain our easting as well as making our landfall. Very important.

4. Targeting

Visual - back sight Rangiroa. Initial course dead reckon islands Ahe and Manihi in daylight hours. Back sight Manihi as last sight of Tuamotus. Birds will be used to find the islands also. Marquesas are high islands (as high as 4,000'). May use birds for targeting, but also may see islands first.

c. Sailing (summary)

1. More extended sailing procedures - 24 hour routine of life at sea.
2. Basic sailing efforts
 - a. Trimming sails to stay close to the wind
 - b. Steering
 - c. Tacking procedures
 - d. Fishing
 - e. Maintenance and cleaning of canoe
 - f. Storm sailing
3. Additional notes:
 - a. Since we will be on an extended leg on open sea, prior to our departure we will not be able to forecast our weather for maybe more than two days. In the event we get caught in a storm, we will use all of our storm procedures.
 - b. This leg could be very interesting if we need to tack to the Marquesas. Although we have never done this before, I feel we are at our best, since the canoe is in excellent shape and the crew well trained.

NEW SAIL SCHEDULE

Change crew in Rangiroa, not Marquesas.

1. Rangiroa not safe anchorage for Hokule'a, let alone Dorcas or Maalea. If we need to go to sea, will not have to cover back
2. If we attempt to go to Marquesas and do not make it, can go to Hawaii and not go back to Rangiroa to change crew
3. Avoid complex transfer of people and cargo to Nuku Hiva
4. It's a simpler sail plan, odds of total success are greater
5. Avoid staying on land longer, less change of getting sick
6. Cut budget by a lot!

Time requirements of Rangiroa to Milolii crew

April 9th lv. HNL via SPIA for PPT

April 10th - PPT-Rangiroa

May 20th -max. time to Milolii

Total: 42 days

6 weeks max.

Sail Plan - For Documentation Purposes

A. Tahiti - Rangiroa

1. Focus -- on navigation and sailing

a. Navigation:

Navigation & sailing can be described as intense over short periods of time. Will investigate sailing for specific single islands opposed to large groups of islands as targets. We will investigate the difficulty the early Polynesians faced in sailing and navigating near dangerous reefs like the Tuamotus. Navigation has to be accurate enough to target islands only in the day light hours to avoid dangerous reefs. We will investigate non-visual techniques of island locating. Investigate techniques to lay off islands & reefs at night to avoid the dangers of sailing at night. We will use other clues such as birds, & fish.

b. Sailing:

Life for crew will not be exposed to the fatigue of long voyaging, but will be quite active. Crew needs to be alert, and quick acting with so many reefs around. There will be a lot of

tacking, adjusting of rigs, sail trim, steering,
anchoring, etc.

2. Areas for possible filming & other types of documentation

a. Pre-sail preparation

1. rigging canoe
2. loading of provisions
3. training of crew
4. sea trials of Hokule'a

b. Specific Port to Port or Island to Island Sails.

1. Tautira to Papeete - short, one day sail (40 miles)

a. Navigation

1. Basic coastal navigation, will
never be outside of sight of
island of Tahiti

b. Sailing

1. Tacking of Hokule'a, avoidance of
reefs, entering small passes
into inside of reefs
2. Basic sailing handling of Hokule'a
near islands and reefs

2. Papeete to Tetiaroa - short, one day sail (26 miles)

a. Navigation

1. Basically still coastal navigation
(Tahiti should always be in sight) sail should be complete in daylight
2. weather selection
3. back sighting island as target
4. selection of sail time (timing speed of canoe with sun)
5. steering mostly with Tahiti in sight
6. targeting Tetiaroa - atol
 - a. birds
 - b. height of coconut trees

b. Sailing

1. weather selection
2. sail setting, steering
3. emergency procedures

3. Tetiaroa - Makatea (90 miles - overnight sail)

a. Navigation

1. back sighting atoll (Tetiaroa)
2. steering celestially (day time)
3. steering celestially (night time)
4. determining speed - to control
time of arrival at Makatea
5. birds
6. visual clues - height of isle
(raised atoll—only a few in
Polynesia)

b. Sailing

- | | |
|---------------------------------|----------------------|
| 1. steering | 6. watch
system |
| 2. sail trim | 7. sleeping |
| 3. emergency procedures (night) | 8. crew "space" |
| 4. seamanship | 9. occupying
time |
| 5. cooking | 10. fishing, etc. |

4. Makatea to Rangiroa - (41 miles - less than
a day)

a. Navigation

1. bare pole off shore Makatea to
time arrival at Rangiroa at

dawn next day

2. choice of weather
3. holding position near island
4. backsighting island of Makatea

b. Sailing

1. sailing celestially at night
2. timing arrival Rangiroa at dawn
3. make sure keep track of speed
4. avoid leeward reef of Rangiroa
in darkness—there are no
coconut trees
5. sail to windward side as soon as
possible
6. need to tack up wind to Passe,
will probably not make it in
the daytime
7. sail off island or could anchor on
lee side west until dawn then
have rest of day to tack to
Passe
8. sail into Passe, on solar tide,
then anchor

- C. Marquesas to Hawaii - April 31 to May 19th - 28th
change crews
reprovision & re-fit Hokule'a
crew rest

1. Summary of Considerations related to this leg.

a. Historical Significance (Mar. - Hawaii)

Archaeological evidence strongly indicates that the first people to colonize Hawaii were from the Marquesas. Which makes this leg very important. There is no existing evidence that these earliest arrivals went back to their homeland. Suggesting there was no two way voyaging. Some could argue that, since there was no two way voyaging, the initial leg to Hawaii may have been accomplished by sailing without navigational technique. But my contention is that they had the means to hold a course and direction.

1. Hawaii is too far away to sail without at least holding a desired course line, requiring the ability to know a minimum of How to Hold Direction. You can't sail in circles to Hawaii, and you can't drift to Hawaii from the Marquesas.
2. A return trip from Hawaii to the Marquesas given any type of trade wind could not be done on one tack. To tack to the Marquesas would take a very long time.
3. There is evidence that Marquesan people have sailed to many parts of the Pacific. In that type of sailing the minimum ability of being able to at least hold direction was probably necessary.

2. Basic Sail Plan - Estimated departure Apr. 31

- a. Marquesas to 4 degrees N = Course due with 780 mi @ 120/day = 6.5 days
- b. 4 degrees N to 9 degrees N Doldrum = course due with 300 mi @ 150 mi/day = 6 days
- c. 9 degrees N to 20 degrees N = Course 57 degrees N of West 780 mi @ 120 mi/day = 6.5 days with current set of 10 mi/day West for area in 1 and 3 will be 13 days = 130 mi West
- d. @ Lat. of Hawaii 20 degrees N to ? = 260 mi @

120 mi/day = 2.3 days

Total = 21.3 days

* Key is Full Moon May 13, latest date to be at latitude of Hawaii at May 24th

Sail is mostly wind on the beam or aft beam on trades.

Requirements for departure is moderate tradewind with no indicated storms. It would be unlikely to have to wait more a couple of days for good weather from the Marquesas.

Range of sail time—Total Distance = 2,200 mi.

Miles/Day	# of Days
80	27 (Hawaii to Tahiti average)
90	24
100	22
110	20 (Tahiti to Hawaii average)
120	18

Most probable sail time = 21.3 days

3. Navigation Course—

a. Course—

All navigational information will be put in the course line.

Course Line - will be the reference that we sail by the line and that we orientate ourselves at sea.

This is a long voyage of basically one tack. (Unlike from Tahiti to Marquesas)

b. Direction—

Use all clues day and night

Most difficult task of getting thru the doldrum area. Max. cloud area

Fatigue is a factor (length of voyage) crew must be prepared to occupy themselves to avoid frustrations from idle time.

c. Latitude—

Important to determine as we keep reference to course line

Most critical information to target the Hawaiian Islands

Will only use one star clue for latitude of Hawaii, since it is the most accurate one for the latitude of Hawaii. Hope it is not too cloudy.

d. Targeting—

Open ocean passage, once we leave the Marquesas—we should not see any other island but the Hawaiian Islands. Hawaii lacks large numbers of Manuku and Noio birds which we use to target the Islands. So, most likely, we will use the extreme height of the Big Islands or Maui as our target.

e. Weather—

Basic tradewind sailing—the months picked should be free of any low pressure systems in both the northern and southern hemisphere. Doldrums—may be extensive or it may not. Spring months the doldrum tend to be less extensive than the summer and winter months.

But Doldrums conditions present two things—

1. Visually the most dynamic area in the tropical Pacific
2. It is the hardest place to navigate, it is here where we should record the most.

f. Storms—

These months are the best because of the lowest possibility of tropical cyclones in both northern & southern hemispheres. Maybe some powerful squalls in the doldrums will require storm sailing procedures.

g. Sailing—

All facets of sailing Hokule'a on a long voyage.
mechanics of sailing & steering
watch duties & responsibilities for:
cleaning
maintenance
safety procedures
basic routines of life at sea, adaptation to a long passage

12/20/86

PRESS RELEASE

From: Polynesian Voyaging Society

Contact: Tino Varney 420129

The Polynesian voyaging canoe, Hokule'a, is expected to arrive in Raiatea in the Society Islands early next week. Since its last visit to Tahiti the Hokule'a has made landfalls twice in the Cook Islands, New Zealand, Tonga, American and Western Samoa, Manua and Aitutaki. It departed Rarotonga for the Society Islands on August 12.

In a recent article written by Honolulu columnist, Bob Krauss, and published in the Honolulu Advertiser, the historical significance of the Voyage of Rediscovery is explained.

"The arrival on JULY 16 of Hokule'a in the Cook Islands from Samoa may have completed the most significant voyage in modern Polynesian history because the canoe traveled from northwest to southeast.

This is in spite of the opinions of some anthropologists, including Thor Heyerdahl, that the old Polynesians could not have migrated from the west because their canoes were not capable of sailing against the southeasterly trade wind.

How Hokule'a did it shows that the old Polynesians knew more about weather in the south Pacific than modern meteorologists until satellites began plotting global weather systems, said an anthropologist last week.

He is Ben Finney, chairman of Anthropology at the University of Hawaii and co-founder of the Polynesian Voyaging Society.

His opinion agrees with that of Hokule'a navigator Nainoa Thompson who studied satellite weather photos before beginning the Voyage of Rediscovery last year.

"We could have sailed on to Tahiti from Samoa," said Thompson last week before returning to the Cooks after resting in Honolulu.

PAPEETE, LE

V/Ref^{oe} :

Polynesian Voyaging Society 2.

"When you think about it, this is the last piece of the puzzle. Language, plants, artifacts all indicate that the Polynesians came from the west.

— "The big stumbling block was, how did they do it? How did they sail against the the trades? The biggest gap between western polynesia and eastern polynesia has been closed."

— Yoshihiko Sinoto, chairman of Anthropology at the Bishop Museum, said he believes the Voyage of Hokule'a from Samoa southeast to the Cooks certainly shows that the old Polynesians could have migrated from west to east."

Finney said the objections of doubters like Heyerdahl imply that the southeast trade winds blow constantly, but they don't.

During the south Pacific summer - winter in Hawaii - winds sometimes blow in the opposite direction like Konas in Hawaii, Finney said. The problem is that summer is also the season for storms in the South Pacific, he added.

"That's why Nainoa didn't want to try it," he explained. "It's unsafe. So he went during the trade wind season. That made it more difficult."

Thompson said a study of satellite photos had taught him that the trade winds are sometimes interrupted by westerly winds even during the tradewind season.

— "In 1984 the photos showed a low pressure system that would allow a canoe to sail east but it was south of Rarotonga (in the Cooks)", he said. "In 1985 it was different. The lows migrated north and would have allowed a passage."

"This year we lucked out. There have been five or six lows during the trade wind season. When we got to the Cooks (from Samoa) another low hit and the wind came around. That's why we could have gone on to

hit it!

"It doesn't happen every year, but even if it happened every

PAPEETE, LE

other year, in 1,000 years that's 500 chances to sail east."

Thompson said a low atmospheric pressure swings around in a clockwise pattern. Asked if the old Polynesians could have recognized the pattern, he said; "If you lived on a beach on an atoll, you'd know; If you fished for a living, you'd know. Otherwise, you'd be dead."

Finney agreed that the old Polynesians must have been able to recognize the weather patterns that permitted them to sail east.

"They couldn't predict the weather," he said; "But when the wind began to shift they would have known what would happen, even if it happened once in 10 years, from what their grandfathers told them."

Thompson said he now believes the winds were not as critical in Polynesian migrations as the seaworthiness of their canoes. "I think the canoe technology had to come first," he said. "It probably took a long time. It wasn't the weather that held them back. Our voyage to the Cooks from Samoa was not a navigational leg, it was a sailing leg. The crew under Shorty Bertelmann did a fantastic job. It was all hands on deck most of the time. We carried more sail than normal in strong winds and pushed the canoe to the max because we had to make easting. The shortest distance is 620 miles but we sailed a horseshoe course that covered 1,100 miles."

Finney said Hokule'a is more comfortable than the voyaging canoes of the old Polynesians and the old canoes probably could not sail so well to windward. "But they must have been able to hold their own on a tack so they wouldn't lose too much while the wind was coming around to where they wanted," he said.

Finney said he is editing a series of seven articles authored by scientists and members of the Hokule'a crew for the "Polynesian Journal" with a world wide circulation among scientists interested in Polynesia. He said the articles will describe significant discoveries made during the voyage of Hokule'a.

[The body of the letter contains several paragraphs of text that are extremely faint and mostly illegible due to the quality of the scan. The text appears to be a formal letter or report.]

"This voyage is giving us a realistic knowledge of the ancient navigators and how they worked their way around the Pacific, so it's very significant." he said.

Thompson said Hokule'a landed at Aitutaki in the Cooks. He will catch a trade wind for Rarotonga then wait for a westerly wind to take him east to Raiatea in the Society Islands."

From Raiatea, Hokule'a will sail to the village of Tautira on the island of Tahiti where she will be hosted by Tutaha Salmon and the community of Tautira. In approximately eight months Hokule'a will leave to complete the last legs of the Voyage of Rediscovery. In May, 1987 the canoe will depart for Rangiroa, the Marquesas and home to Hawaii.
