Date: September 9, 1994

Subject: Crew Selection for 1995 Sails

We have completed the initial selection of the core crew of 61 individuals selected to sail on one of the attached sails.

Please complete the enclosed sail survey and return to J. Nainoa Thompson by September 23. This survey will help to determine every individual selected to sail on a long voyage in the South Pacific will undergo a physical and swim test. Those chosen to sail inter-island voyages will undergo a final selection for crews will be made after November 1. Final selection for crews will be made after November 1. You will be notified by mail no later than October 15 if you have been selected to participate in.

If your survey is not received by the above date we will assume you are not interested and/or are unable to make any of the scheduled sailings.

Polynesian Voyaging Society
Pier 36
Honolulu, HI 96817

Or fax to 531-7135. If there are any questions, regarding the survey, call 531-7240.

Are you interested in participating in next year's sail?

If so, which sail(s) would you be available to participate available to sail on.)

PVS Dietary Program

PVS TRAINING SEMINAR

5 NOV 94 Pwr 36

Community Project - Voyaging Foods

1. Participants:
Ben, Nate, Donna, Naomi, Clair, Sharon, Moku, Tava, Pinky,
2. Foods:
Banana, Taro, Ulu, Sweet Potato, Sugar Cane, coconut, fish, squid
3. Preparation:
Tava describing banana drying and wrapping:
Slice yellow ripe bananas lengthwise in half
Lay out to dry on woven lauhala or other matting such as woven banana leaf
Place in drying boxes and keep out of rain, bugs
Turn every 12? hours
After 2-3 weeks? prepared to wrap
Lay out 10 slices, overlap another ten about 1/3rd from the bottom of the first
Wrap in dried banana stock leaves-overlapping lengthwise
Tie with sennat or twine in portions of meals anticipated
Hang with string like sausage
Keep as dry as possible. Needs air. If kept in bucket, must take out to air often.
4. School Involvement:
Nainoa knows of schools willing to help- especialy the No Na Mamo project schools:
Wai'anae High - Oahu
Hale o Ho'oponopono - Kona
Konawaena - Kona
Hilo High - Hilo
5. Diet Candidates:
Nainoa, Tava, Chad
6. Meals Required:
1 meal / day of traditional diet on leg #1 (30 days) -- 30 meals/ person
2 meals / day of traditional diet on leg #2 (15 days)-- 32 meals / person
3 meals / day of traditional diet on leg #3 (21 days)-- 63 meals / person
7. Considerations:
Nutritional requirements
Measurments of weights/body fat/etc of crew
Dietary journals on voyage

MEMORANDUM

To: Crew Members
From: Jarnell Martinson
Date: November 8, 1994
Subject: All Crew Seminar

This is just a reminder to all crew members that our mandatory all crew seminar and swim test will be held on November 18-20, 1994. The seminar will begin at 6:00 pm on Friday evening and conclude about 6:00 pm Sunday afternoon.

For those who have not as yet taken their physicals, they must be taken during that weekend. Enclosed is a tentative agenda for the weekend's events.

For our outer-island crew, please call the PVS office at 531-7240 to confirm with Jarnell or Shantell whether or not you will be in attendance so that airline coupons and reservations can be made and mailed out to you.

If you have any questions or problems, please give us a call. Mahalo!

MEMORANDUM

TO: All Crew Members
FROM: Nainoa Thompson
DATE: December 15, 1994
SUBJECT: Medical Evaluation / Crew List Notification Update

I hope this letter finds all of you doing well. Our voyage is fast approaching and yes our final crew selection is almost complete. Considering that arrangements need to be made and finalized with one's family and employer, as soon as the crew list is finalized, we will be notifying you by phone and an official notification letter will be sent out immediately.

Just to let you know, all went well with everyone's medical evaluations. Enclosed you will find your personal medical evaluation/ suggestion letter from our doctors (Dr. Ben Tamura and Dr. Nathan Wong).

As a reminder, our next crew seminar will be held from January 13-16, 1994. Please keep these dates in mind so that all can be in attendance as it is our last crew training sailing/ seminar before our big "Voyage." For our outer-island crew, airline coupons will be sent along with our crew list notification letter.

If you have any questions regarding the above, please feel free to call Jarnell or Shantell at 531-7240.

Mahalo for your patience!

Here is the **INFORMATION SHEET** with "brief" explanations I referred to:

When I spoke to many of you during the recent physical exams, I mentioned the possibility of getting some donated gamma globulin and tetanus vaccine. I am sorry to say that I spoke too soon ... it did not work out. Thus, if any of you received recommendations to update your immunizations, I am afraid that you must pursue such at your own expense. To help you decide whether to follow through with our recommendations, I wrote up this summary for you to review at your leisure.

So far, I feel the travels of the PVS have been very fortunate from an infectious diseases perspective. There have been no cases of tetanus (lockjaw), syphilis, polio, acute Viral Hepatitis A and no cases of measles brought into communities we have visited. We have been lucky indeed. However, from a policy perspective, luck is fickle; if it goes our way, terrific ... we cannot plan something based entirely on luck. We need something more concrete, more reproducible and predictable. If luck goes our way, good. But if it does not, we need to be prepared and to be accountable.

What follows is a paraphrased, plagiarized summary from the **U.S. Public Health Service** regarding immunizations for U.S. travelers going to the Society Islands and the Marquesas (as of October 1994).

I. MANDATORY IMMUNIZATIONS

None

II. RECOMMENDED

- 1) **Tetanus (Td)** -- if not received within the last 5 years.
- 2) **Measles** -- **our MMR** -- if born after 1956 and you have never had a doctor diagnosed case or a blood test to prove immunity or written verification of at least TWO vaccines with live-attenuated virus after age 1.
- 3) **Pneumococcal vaccine** -- if you are older than age 65, or any age with chronic health conditions such as diabetes, asthma, heart/lung/blood-vessel diseases. Only one shot is required for life, no boosters necessary.
- 4) **Influenza vaccine** -- if you are older than age 65, or any age with chronic health conditions. Influenza vaccine needs yearly boosters.

III. OPTIONAL

- 1) **Hepatitis A (immune gamma globulin)** -- Hepatitis A is a food and water borne viral illness. No one dies from Hepatitis A and there is no chronic carrier state. It just makes you sicker than hell and temporarily jaundiced. While you are ill, you may be prone to dehydration and electrolyte imbalances.
- 2) **Hepatitis B** -- this is a bummer. 10% become chronic carriers and risk liver cancer, 1% acutely die. It is transmitted by sexual contact and blood transfusions or blood contaminated equipment (needles, sutures, scalpels). The vaccine is recommended for health care workers, persons anticipating direct contact with blood, those anticipating sexual contact with locals whose hepatitis status you don't know or those anticipating using local health care facilities.

for several weeks, if you will be going the entire way Ha wish to be careful. Ask your personal doctor.

I am missing Surf Trac because of this memo, so please want to make sure that those of you who received recom and/or measles booster follow through with it.

Tetanus is a killer. It is an acute life threatening neurom neurotoxin produced by a bacteria introduced under the s The toxin causes uncontrolled muscle spasms of such int reported to break their own bones from their own uncont paralyzes your ability to breath, swallow, move and caus 100% preventable with the tetanus vaccine (Td). The vac years ... every 5 years if the wound is particularly "dirty" members get a Td booster if you have not had one in the and you do not know who to ask, play it safe and get the know a physician to ask or if you do not have medical in

Measles ... this is of concern only for those born after 19 it is highly contagious to susceptible individuals. In adu brain damage from it. Our greatest fear is an outbreak in we have left and the source of the infection is traced to o Public Health Service and the American College of Imm booster vaccine (MMR) for all travelers born after 1956 immunity: 1) a doctor diagnosed you with measles (not measles), 2) you do a blood test for measles antibody tite written documentation that you have had at least two dos

vaccine received on or after age one. If you are not sure, the least expensive and safest thing to do is to get MMR booster. Talk it over with your doctor or call me.

A special note about MMR ... women need to make certain that they are not pregnant when they get the vaccine and need to take precautions not to get pregnant for at least three months after they receive the vaccine. If you are going to get the MMR and gamma globulin, make sure you get the MMR first, at least two weeks BEFORE the gamma globulin. If you get the gamma globulin first, you must wait at least 6 weeks (preferably 3 months) before you can get the measles vaccine. If you have a serious allergy to eggs or to neomycin, you cannot get the vaccine. Call me.

Finally ... mosquitoes. Tahiti has Dengue fever. Never mind what it is ... you don't want to get it. It is transmitted by mosquitoes. Everyone who will be spending sometime on land in Tahiti or the Marquesas should bring mosquito repellent (Off). Its summertime there, it will be hot and muggy. Protective clothing should be light and breathable -- spray the repellent on your clothing and apply it to the exposed body parts remaining. Try it at home first to make sure you don't have an allergic reaction to it up there.

- 12) Each individual is considered an important part of team itself or any other individual.
- 13) Individuals demonstration of unique skills
- a) documentation
 - b) education
 - c) research
 - d) doctors

There are 5 categories for sailing participants: (The number which must be met.)

- a) Masters - all
- b) Apprentice - all except 2 & 3 (age = 25 - 40)
- c) Community Resources - 4, 8, 9, 10, 11
- d) Educators - 4, 8, 9, 10, 11
- e) Documentors - 4, 8, 9, 10, 11

- NOTE:**
- 1) Exceptions can be made to 1-3. If anyone is not considered for masters program.
 - 2) You risk the possibility of being dropped if you fail any three activities or functions, relating to notification.

RATING SCALE:

- | | | | |
|---|---|------------------------|---|
| 1 | - | Exceptional | 4 |

Donna M. Wendt

Dear Donna:

You have passed your physical and your basic vaccinations are all up-to-date. You are cleared to sail without restrictions.

I have started my Drug Salesman harassment campaign and am starting to stockpile meds for the medical supplies. We should get together and inventory what we have and then all the medical people should get together and decide what we really need to bring ... in the past I think I over-stocked the supplies. Also, if we are going to need supplies that we cannot get from drug salesmen, we need to decide who gets what from where and how.

Call me at 737-4488 or Nate Wong at 734-4810 if you have any questions or concerns.

Sincerely,

Ben Tamura, M.D. sc

Ben Tamura, M.D.

VOYAGE OF REDISCOVERY

POLYNESIAN VOYAGING SOCIETY

Pier 36, Honolulu, HI 96817

January 24, 1995

Commander Tripler Army Medical Center
Brigadier General James E. Hastings
Attention: MCHK-CU
Tripler Army Medical Center
Honolulu, HI 96859-5000

Subject: LTC Donna Wendt, RN

Dear Sir:

On Behalf of the Polynesian Voyaging Society, we wish to express our sincere appreciation for your consideration in allowing LTC Donna Wendt to participate in our coming voyages. She was invited to be a crew member aboard the *Hawa'i'iloa* because of her background in health care. When *Hawa'i'iloa* sails from Tahiti to the Marquesas, LTC Wendt will be in charge of medical triage, preliminary clinical assessments and the administration of medical care for on-board emergencies; she will be under the supervision of our Physician-In-Charge Dr. Robert Overlock. Dr. Overlock will be aboard a separate vessel, the escort boat *Kamohole*.

The vision of the Polynesian Voyaging Society is *Ho'olokahi*: to bring about unity and harmony among humanity, nature and spiritual forces. Our vision is to contribute towards a safe and healthy future for Hawai'i; to learn and in the process to educate others. LTC Wendt is vital to the health and safety of our crew and therefore to fulfilling our vision. She will be the only crew member who is active duty military and the only Registered Nurse invited to sail with us.

The scope of this project extends far beyond the limits of this State. LTC Wendt by being aboard the *Hawa'i'iloa* gives our Physician-In-Charge the mobility to provide Assistance to other voyaging canoes who will be participating from throughout Polynesia.

Brigadier General James E. Hastings
January 24, 1995
Page 2

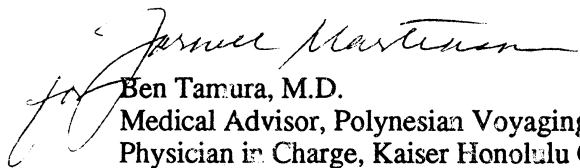

All of our crew members (with whatever unique skills they possess) are volunteers. LTC Wendt has already volunteered much of her time in preparation for this trip; her participation is an important one with a profession-specific purpose. Her participation links our endeavor toward expanding cultural awareness with your sensitivity and reputation for humanitarian assistance directed to the needs of the peoples of the Pacific Basin.

We thank you for supporting our mission of education.

Sincerely,

Nainoa Thompson

8:00 a.m. - 11:00 a.m.	Prep Canoes
11:00 a.m. - 12 noon	Lunch
12 noon - 5:00 p.m.	Classroom/Support <i>E'ala</i>
5:00 p.m. - 6:00 p.m.	Dinner

E'ala - Team 1

8:00 a.m. - 11:00 a.m.	Prep Canoes
11:00 a.m. - 12 noon	Lunch
12 noon - 4:00 p.m.	Sail (with leadership of Team 2)

E'ala - Team 2

8:00 a.m. - 11:00 a.m.	Prep Canoes
11:00 a.m. - 12 noon	Lunch
12 noon - 4:00 p.m.	Classroom

Navigators

9:00 a.m. - 10:00 a.m.	Meeting with Tom Shroeder - UH
10:00 a.m. - 11:00 p.m.	Prep Canoes
**	Follow above schedule for Teams 1 & 2

Saturday, January 14

Team 1

9:00 a.m. Arrive San Souci/Swim to shore
10:00 a.m. - 5:00 p.m. Classroom/Support *E'ala*

Team 2

9:00 a.m. - 9:00 a.m. (Sun) Arrive San Souci / Swim to Canoe / Sail

E'ala - Team 1

9:00 a.m. - 11:00 a.m. Classroom
11:00 a.m. - 12 noon Lunch
12:00 noon - 4:00 p.m. Classroom

E'ala - Team 2

9:00 a.m. - 11:00 a.m. Classroom
11:00 a.m. - 12 noon Lunch
12 noon - 4:00 p.m. Sail

Sunday, January 15

Team 1

9:00 a.m. Arrive San Souci / Team 1 navigators & South Pacific crew swim to canoe
9:00 a.m. - 5:00 p.m. Meetings at Pier 36

Team 2

9:00 a.m. Arrive San Souci/Navigators to stay on-board canoe/Remaining crew swim to shore
10:00 a.m. - 5:00 p.m. Meetings at Pier 36

Navigators

9:00 a.m. - 12:00 noon (Mon) Sail

E'ala

9:00 a.m. - 12:00 noon Arrive San Souci/Swim to Canoe/Sail
12:00 noon Pau

1995 SAIL SCHEDULE

February 3 - 5*	Honolulu - Hilo
February 7 - March 22**	Hilo - Tautira
March 29 - April 12***	Tautira - Marquesas
April 17 - May 12****	Marquesas - Hawai'i
May 13	Hawai'i - Kualoa - Keehi Lagoon
June	Alaska/British Columbia - 1st leg
July	Alaska/British Columbia - 2nd leg

NOTES:

- * February 6 -- Hilo Departure Ceremonies
- ** March 15-20, 1995 -- Taputapuatea, Raiatea for the Marae re-dedication
- *** May 12, 1995 -- Kualoa, Oahu (Private Ceremony)
- **** May 13, 1995 -- Keehi Lagoon, Oahu (Welcome Home Ceremony)

For airline flights to Tahiti, you can take a Hawaiian Airlines flight from Hawaii to Tahiti and once in Tahiti you will need to catch an Air Tahiti flight to Raiatea.

may be joined by a third Hawaiian canoe, *Makali'i*, etc.
The Hawaiian canoes will meet five other Polynesian
and '*A'ā Kahiki Nui* from Tahiti; *Te Aurere* from Aotearoa
from the Cook Islands).

Mar. 18: The canoes will go to Ra'iātea for the re-dedication.

Mar. 20: The canoes will go to Faaha Bay, Taha'a, for the
Taputapuātea Marae.

Mar. 22 or 23: The canoes will go from Taha'a to Papeete.

Mar. 23 -26: The canoes will go from Pape'ete to Taupū
Nukuhiva.

Mar. 29-Apr. 12: The canoes will go from Tautira to

Apr. 17-May 11: The canoes will sail from Nukuhiva
in Hawai'i. They will meet at Kalaupapa Moloka'i on the
occasion of an ahu to voyaging on the morning of May 11.

May 12: The canoes will anchor at Maunalua Bay, Oahu.

May 13: The canoes will sail to Ke'ehi Lagoon for celebration
and welcoming to Hawai'i the Polynesian Canoes.

NOTE TO TEACHERS: To plot the course of the voyage with a courseline on it. These should be provided and published in one of the daily papers. Teachers may raise issues raised by having students brainstorm on the issues relevant to the daily lives of the students. For example, how much living space on the canoe (See Part 2, question 3). How much space calculate how much living space is in their homes. How, also, do conflicts arise over space and if so, how?

Part 1. Planning. Preparation.

- 1. Purpose of Voyage:** Why another voyage to the first for *Hawai'iloa*. What makes this voyage important? What is the sail plan?
- 2. Departure:** What does it feel like to leave an island and go to sea in an open canoe? What are some of your concerns? What risks are you taking? What sacrifices are you making?
- 3. Exploration:** Why did the Polynesians leave their islands for exploration important to human survival? Is the same true today? If so, in what ways? What remains to be explored?
- 4. Implementation:** How did this Explorations project come about? What objectives? When did it get started? Who were the people involved to make the voyage a reality?

- **Taiohae, Nukuhiva:** Where is Nukuhiva? Where will they anchor or dock? What is the significance of the place in Polynesian traditions?
- **Hawai'i:** What do you think the first Hawaiians thought of Hawai'i? Was it like their home in the Pacific? How did they feel when they landed on Hawai'i? How has Hawai'i changed since they arrived? How much worse? Where is Hawai'i headed today?

4. After Landfall on Re...

1. **Recovering Voyaging Traditions:** What Hawaiian voyaging traditions did the Polynesian voyaging traditions from this voyage? How did they use these traditions to get here? Could they have sailed back south to their homelands? What if the first settlers have left their homelands to come here?
2. **Survival on Islands:** How were settlers able to survive on the islands of Hawai'i without any cultivated plants? What knowledge did they have? What was possible for Hawaiians to survive and flourish on the islands? How did they survive before Europeans sailed in the the Pacific?
3. **Future of the Islands:** How do you see Hawai'i in the future? How can the people survive here? Why or why not? What can we do to help? How can we insure a safe healthy, productive future for Hawai'i?

HAWAI'ILOA

ANTIBIOTICS

-Amoxicillin 250mg-	-	#100	2-1	2/99	(Note, 2-1 means chest #2, ziplock 1)
-Augmentin 250mg-	-	#60	2-1	10/96	
-Augmentin 500mg-	-	#90	2-1	10/96	
-Azithromycin 250mg	-	#66	2-1	4/96	
-Cephadrine 250mg-	-	#40	2-1	7/97	
-Ceftiaxone 1gm-	-	#2	2-1	1/96	
-Cipro 750mg-	-	#24	2-1	4/96	
-Clindamycin 150mg	-	#40	2-1	1/96	
-Fluconazole 100mg	-	#24	2-1	8/95	
-Metronidazole 250mg-	-	#90	2-1	1/96	
-Septra-DS-	-	#30	2-1	1/96	

-Antibiotic creams - see SKIN.

SEA-SICKNESS/NAUSEA

-Ephedrine 25mg-	-	#25	2-2	1/96
-Meclizine 12.5mg-	-	#40	2-2	1/96
-Prochlorperazine (compazine)				
pill 10mg-	-	#100	2-2	10/96
spansule 15mg-	-	#50	2-2	11/96
IM 5mg/cc (2cc vial)-	-	#5	2-2	6/95
-Promethazine (phenergan)				
pill 25mg-	-	#40	2-2	1/96
-Transderm-scop-	-	#6	2-2	12/95

G.I. STUFF (ACID, CONSTIP, DIARRHEA, CRAMPS,)

Acid-peptic:

-Tagamet 800mg-	-	#30	2-3	8/96
-Tagamet 400mg-	-	#60	2-3	7/96
-Prisolec 20mg-	-	#24	2-3	1/96

GI STUFF (continued).Constipation:

-Dulcolax tabs 5mg-	-	#10	2-3	6/96
-Feen-A-Mint gum-	-	#16	2-3	4/98

Diarrhea:

-Imodium A-D 2mg-	-	#30	2-3	5/95
-Diphenoxalate/atropine (Lomotil)	-	#30	2-3	1/96
-PeptoBismol tabs-	-	#30	2-3	2/96

Cramps:

-Belladonna (donnatol)-		#25	2-3	1/96
-------------------------	--	-----	-----	------

ETC (if want to make oral rehydration solution):

-Klor 20mEq/pkt-	-	#5	2-3	5/96
------------------	---	----	-----	------

PAIN, OTHER NARCOTICS, ANTI-INFLAMMATORIES, AND GOUT.Pain/narcotics:

-Acetaminophen (tylenol)-				
325mg -	-	#100	2-4	1/96
-Hydrocodone/APAP (vicodin)				
-	-	#20	2-4	1/96
-Lidocaine (see Wound Care)				
-Morphine 10mg/cc-	-	#2	2-4	8/95
-Meperidine 50mg/cc	-	#2	2-4	8/95
-Versed 2mg/2cc-	-	#2	2-4	6/96

Anti-Inflammatories:

-Asprin 325mg-	-	#100	2-4	2/95
-Motrin 800mg-	-	#75	2-4	1/96
-Indomethicin 25mg-	-	#60	2-4	1/96

Steroids:

-Prednisone 20mg-	-	#50	2-4	1/96
-Celestone 6mg/cc (5cc vial)-	#1	2-4	9/95	
-Depomedrol 80mg/cc (5cc)-	#1	2-4	2/97	
-Decadron 4mg/cc (5cc)-	#1	2-4	4/97	
-Kenalog 40mg/cc (5cc)-	#1	2-4	5/97	
-Solumedrol 40 mg/cc (1cc)-	#5	2-4	6/97	

Gout:

-Colchicine 0.6mg-	-	#60	2-4	1/96
-Indocin (see above)				

ANTI-ALLERGY, URI's AND ANXIETY.

Anti-allergy:

-Anaguard pen (Epinephrine 1:1000 - 0.3cc dose, 2doses/pen)-				
-	-	-	#1	2-5 1/96
-Epinephrine 1:1000 (1cc amp)-				
-	-	-	#2	2-5 8/96
-Claritin 10mg -	-		#20	2-5 9/96
-Diphenhydramine (Benadryl)-				
25mg capsule -			#40	2-5 1/96
50mg/cc (1cc vial)-			#3	2-5 6/97

URIs:

-Sudafed 30mg-	-		#24	2-5 4/97
-PPA/guaiafenesen (Entex-LA)-				
-	-	-	#30	2-5 1/96
-Prometh VC/Codeine-			#4oz	2-5 1/96

Anxiety:

-Buspar 10mg -	-		#7	2-5 12/95
----------------	---	--	----	-----------

CARDIOVASC, PULMONARY, UROLOGICAL.

Cardiovasc:

-Captopril 25mg-	-		#30	2-6 7/95
-Nifedipine 10mg-	-		#10	2-6 3/95
-Nitroglycerin 0.4mg	-		#25	2-6 10/96

Pulmonary:

-TheoDur 300mg-	-		#20	2-6 3/95
-Proventil Repetabs 4mg-			#20	2-6 3/95
-Proventil MDI -	-		#1	2-6 4/96
-Beclovent MDI-	-		#1	2-6 6/96
-Tilade MDI- -	-		#1	2-6 6/96

Urological:

-Prazosin 2mg-	-		#13	2-6 9/95
-Foley tray (16F catheter and attached bag)				
-	-	-	#1	1-- (Search for it near the bottom).
-Xylocaine jelly 2% 30cc-			#1	2-6 6/97

EAR, NOSE, ORAL, DENTAL.

Ear:

-60cc syringe, luer lock tip-			#1	2-7 -
-Luer lock nozzel-	-		#1	2-7 -
-Ceruminex 6cc-	-		#1	2-7 8/98

EAR (continued):

-Cortisporin S Otic (Neomycin, polymyxin B sulfate, etc) 10cc
 - - - #2 2-7 9/96

Nose:

-Beconase AQ 25gm - #1 2-7 9/96
 -Neosynephrine drops 15cc- #1 2-7 2/98
 -Gentamicin Ointment 0.1%-
 -15gm - - #1 2-7 9/99
 -Merocoele - Pope posterior nasal packing
 - - - #1 2-7 6/97

Oral:

-Carmex 1/4 oz- - #1 2-7 -
 -Floss - - #1 2-7 -
 -Chapstick plain- - #1 2-7 -
 -Chapstick with SPF-15- #2 2-7 -
 -Triamcinolone dental paste 0.1% (Kenalog in orabase)
 5gm - - #3 2-7 6/97

Dental:

Call Kamahele for help ... we warned you !!!

EYES.

-Artificial tears 15cc - #2 2-8 5/96
 -Blinx sterile ophth irrigating solution-
 4oz - - #2 2-8 5/95
 -Fluorescein strips - #6 2-8 ?
 -Proparacaine 0.5% 15cc- #1 2-8 7/95
 -Naphcon-A 15cc- - #1 2-8 9/94
 -Neomycin/polymyxin B sulfate/gramcidin ophthal gtts-
 10cc - - #1 2-8 1/96
 -Gentamicin ophthal gtts 5cc- #1 2-8 4/95
 -Sulfacetamide 30% 15cc- #1 2-8 2/96
 -Sterile eye patches - #3 2-8 -

DIABETES.

-D50W 50cc - - #1 2-8 9/97
 -Glucagon kit - - #1 2-8 7/96
 (Mau has chemstrips and lancets, tolbutamide 500mg).

SKIN STUFF.**Antibacterial:**

-Bacitracin Ointment packets-			
- - -	#40	2-9	7/95
-Bactroban 2% 15gm -	#2	2-9	12/95
-Cleocin-T 1% gel 30gm-	#1	2-9	11/95
-Silvadene 1% 50gm -	#1	2-9	11/95
-Benzoyl H2O2 10% 60gm-	#1	2-9	3/96

Antiviral:

-Zovirax ointment 5% 15gm-	#1	2-9	11/96
----------------------------	----	-----	-------

Antifungal:

-See fluconazole above-			
-Clotrimazole 1% 15gm-	#3	2-9	6/96
-Lamisil 1% 30gm- -	#3	2-9	8/96
-Oxistat 1% lotion (7cc)-	#5	2-9	3/96
-Nystatin/triamcinolone cream-			
15gm - -	#4	2-9	11/96
-Lotrisone 15gm- -	#1	2-9	4/96

Steroid:

-1% hydrocortisone 20gm-	#2	2-9	11/98
-0.05% Lidex-E 15gm -	#3	2-9	11/97
-0.05% Diprolene AF 15gm-	#1	2-9	10/96

Emollients:

-Vaseline Intensive Care 3oz #1	2--	-
-AlphaKeri 2 oz - #1	2--	-

Scabies/Lice:

-Kwell 1% (Lindane) 60gm-	#1	1--	10/96
---------------------------	----	-----	-------

Mosquito repellent:

-Ultrathon (DEET) 60cc-	#11	2--	-
-------------------------	-----	-----	---

MAN-O-WAR/JELLYFISH.

-White Vinegar 16oz -	#1	1--	-
-----------------------	----	-----	---

ANTISEPTICS/CLEANSERS.

-Alcohol pads (Isopropyl)-	#100	1-F	-
-Benzalkonium antiseptic towelettes			
- - -	#100	2--	-

ANTISEPTICS (continued).

-4% Chlorhexidine (Hibiclens)					
4oz soap	-	#4	1-E	8/95	
Scrub brush	-	#4	1-E	8/95	
-Waterless soap (Calstat)					
4oz	-	#5	2--	10/96	
-Peroxide 16oz-	-	#1	2--	1/97	
-Povidine Iodine-					
10% solution 4oz-		#3	2--	8/97	
Swabsticks 3/pkt-		#11	2--	1/96	
Pads	-	#100	2--	9/97	
Ointment 30gm-		#3	2--	11/96	
Ointment 1gm/pkt-		#50	2--	4/96	

ORTHOPEDIC STUFF.

-Casting stuff aboard Kamahele.

Fleet Communications and Emergency Response

Introduction to Fleet Readiness:

The highest priority on this historic 1995 voyage to Nuku Hiva is **safety**.

- The safety and health of crews, canoes, and escort vessels is paramount.
- Safety and health of crews, canoes and escort vessels will be the dominating factor in all decision making.
- The responsibilities for sea readiness, health and safety lies with the individual canoe captains as their decisions directly affect the lives of their crews.
- A thorough knowledge of EPIRB deployment, rescue procedures and fleet communications is an absolute necessity.

Emergency Readiness

The Category I 406 mHz EPIRB (Emergency Position Indicator Radio Beacon) transmits a unique identifying message at 406 mHz to Search and Rescue satellites. The code transmitted allows the National Oceanic and Atmospheric Administration (NOAA) to identify the name and type of vessel through a computerized file registration system. Intermediate and short range location is aided by simultaneous transmission on 121.5 mHz and the built-in xenon strobe. It can be deployed and activated automatically by hydrostatic release or may be deployed manually.

The 406 E.P.I.R.B., properly registered, is a vital link to quick emergency response. All sailing canoes and escorts must carry one. Detailed descriptions of procedures are included in the following pages.

- Each escort boat, in addition, should carry a single side band, high frequency radio as distances will be well out of V.H.F. range.
- Regular contacts, twice a day, at sunrise and sunset between escort vessels are important as they provide early detection of malfunctions and allow ready access to valuable data for scientific study.

- The **Ham Radio Frequencies** (see Table 3) is an excellent source for weather reports from ships all over the Pacific. You can tune in and listen to these frequencies, however you must be a licensed ham operator to transmit on them. Only on a mayday emergency can these frequencies be used by an unlicensed operator as they can provide quick response.
- Additional channels for ship to ship and ship to shore communications can be found in the **International Voice Channel Designations Chart** (see Table 4).
- The **Weather Fax Frequencies** for Honolulu, Hawai'i can be found on Table 5.
- The fleet working channels **4-Bravo, 6-Bravo, 8-Bravo** are dependent on ground wave transmissions. Ground waves hug the surface of the earth and ocean to travel approximately 100 to 200 miles out from your transmitter. Your ground wave signal is always there, day or night, and does not depend on anything other than a good, strong transmitted signal. For further information on **Band Selection** see Table 6.

Emergency Response

The fleet will be mobilized for a rescue effort **only** when we receive information from the French or U.S. Coast Guard Search and Rescue that an emergency position indicator radio beacon, EPIRB, belonging to the fleet has been turned on.

Emergency Situation

When a sailing canoe has not reported in more than 24 hours or in heavy weather, Captain Steve of *Gershon II*, Second Fleet Central, will open communications with Coast Guard Search and Rescue on **I.T.U. Channel #1205, 12242 kHz Tx 13089 Rx**, as they would be the first to receive emergency satellite transmissions.

- In the event of an EPIRB hit, Captain Steve of *Gershon II*, Second Fleet Central, will communicate the position of the distressed vessel to Captain Alex at Fleet Central. Fleet Central will direct emergency response.
- Sailing canoes left unattended will reduce speed until reunited with escort vessel.
- **In extreme emergency situations**, individual canoes and escorts can initiate direct contact with Coast Guard Search and Rescue on I.T.U. channel #1205.
- The Coast Guard Search and Rescue will contact the fleet immediately, minimizing response time.
- The captains of the individual canoes have the responsibility to train their crew members in the correct deployment of the EPIRB unit.

Medical Emergency

The captain of each vessel has the responsibility of determining what constitutes a medical emergency, and should the situation be critical initiate direct communications with Coast Guard Search and Rescue on I.T.U. Channel #1205.

- All medical emergencies must be reported to Fleet Central. It is the function of Fleet Central to coordinate all medical emergencies as they will know the location of medical personnel associated with the fleet.
- In the severest emergencies, captains may for expediency contact Coast Guard Search and Rescue directly on I.T.U. Channel #1205.
- Coast Guard Search and Rescue will coordinate evacuation should it be required.
- Fleet Central will monitor Coast Guard Radio frequencies.

Medical Personnel with the Fleet

Dr. Bob Overlock will be sailing the entire voyage on *Kamahele* and *Hawai'i Loa*.

Dr. Ben Tamura will be sailing from Hawai'i to Tahiti on the *Hokule'a*.

Dr. Nat Wong will sail from Marquesas to Hawai'i on the *Hokule'a*.

Paramedic Donna Wendt will sail from Tautira to the Marquesas.

Paramedic Mel Paoa will sail from Tautira to Hawai'i.

Paramedic Aaron Young will sail from Tautira to Hawai'i.

- An inventory of medical supplies carried on each vessel must be submitted to Dr. Overlock and Dr. Tamura before departures.

Table 3

Ham Radio Maritime Mobile Net List

Time(UTC)	Frequency (mHz)		Days	Areas
0200/0100	7.290	Hawaii PM Net	Daily	Hawaii
0200>0400+	14.300/314	Seafarers Net (M/M)	Daily	Pacific/W. Coast
0400	14.318	Arnold's Net	Daily	South Pacific
0300	14.313	Pacific Maritime Net	Daily	Pacific
0630	14.180	Pitcairn Net	Mon	South Pacific
0700	14.265	Pacific Island Net	-	C/Pac - W/Pac
1700	14.340	California-Hawaii Net	Daily	Cal/Hawaii
1800	7.076	South Pacific Cruising Net	Daily	South Pacific
1900	7.285	Hawaii Maritime Mobile Net	Daily	Hawaii
1800>1900	14.285	Kaffee Klatch Un-Net	MWSat	Hawaii-Tahiti
1900+	14.239	Bay of Isles Net	Daily	New Zea/S. Pacific
2200	21.350	Pitcairn Net	Tues	South Pacific
As needed+	14.325	Hurricane Net	-	Pacific

Notations

- An excellent source for weather reports from ships all over the Pacific. You can tune in and listen to these frequencies, however you must be a licensed ham operator to transmit on them. Only on a mayday emergency can these frequencies be used by an unlicensed operator as they can provide quick response.
- Arnolds Net on 14318 at 0400 (UTC) or 6:00 p.m. Hawaiian Time will be invaluable source of weather information as he is briefed on the fleet movement and will target weather information to our sector.

Table 1

Coast Guard Working Frequencies

The government frequency 2182 kHz and 2670 kHz are widely used by recreational boating for communicating with U.S. Coast Guard Shore Stations and Ship Stations.

<u>Your Transmit</u>	<u>Your Receive</u>	<u>I.T.U. Channel #</u>	<u>Remarks</u>
2182kHz	2182kHz	None	International distress & calling frequency to all Coast Guard & rescue agencies worldwide
2670kHz	2670kHz	None	U.S. Coast Guard working channel
4134kHz	4426kHz	424	500 mile Coast Guard working channel
8240kHz	8764kHz	816	Medium range Coast Guard working channel
12242kHz	13089kHz	1205	Long range Coast Guard working channel
16432kHz	17314kHz	1625	Day/Evening long-range Coast Guard working channel

Notations

- When using these channels you must first establish communications on the appropriate calling frequency, 2182kHz.
- In the event of a 406 EPIRB hit, the Coast Guard would receive the satellite transmission and try to contact the fleet on I.T.U. channel number 1205 or 12242kHz.
- U.S. Coast Guard weather broadcast on I.T.U. channel #601, 816, and 1205 will be at 0545, 1145, 1745, and 2345 UTC. This is a computer-generated voice and some practice will be needed to understand the exact coordinates for highs and lows, center of storms, ITCZ, and openings on the equator. Excellent weather source.

Table 2

Ship to Ship Channels

These channels are set aside exclusively for ship to ship communications worldwide.

Ship Frequencies (Simplex)			
Minimum Range	Channel Code	Frequency kHz	Best Time
50 miles	2-Alpha	2065.0	Night
50 miles	2-Bravo	2079.0	Night
50 miles	2-Charlie	2096.5	Night
50 miles	3-Alpha	3023	Night
150 miles	4-Alpha	4146	Night
150 miles	4-Bravo	4149	Night
150 miles	4-Charlie	4417	Night
170 miles	5-Sierra	5680	Day/Night
200 miles	6-Alpha	6224	Day/Night
200 miles	6-Bravo	6227	Day/Night
200 miles	6-Charlie	6230	Day/Night
200 miles	6-Delta	6516	Day/Night
400 miles	8-Alpha	8294	Day
400 miles	8-Bravo	8297	Day
1,000 miles	12-Alpha	12353	Day
1,000 miles	12-Bravo	12356	Day
1,000 miles	12-Charlie	12359	Day
5,000 miles	16-Alpha	16528	Day
5,000 miles	16-Bravo	16531	Day
5,000 miles	16-Charlie	16534	Day
5,000 miles	18-Alpha	18840	Day
5,000 miles	18-Bravo	18843	Day
10,000 miles	22-Alpha	22159	Day
10,000 miles	22-Bravo	22162	Day
10,000 miles	22-Charlie	22165	Day
10,000 miles	22-Delta	22168	Day
10,000 miles	22-Echo	22171	Day
10,000 miles	25-Alpha	25115	Day
10,000 miles	25-Bravo	25118	Day

Notations

Frequencies in bold are the fleet's working channels for ship to ship communications. Other channels can be used if there is too much traffic on the fleet frequency.

Example:

"*Hawai'i Loa* this is *Hokule'a*. 6-Bravo is busy. I'll meet you on 8-Bravo."

"Roger that *Hokule'a*. Going to 8-Bravo. *Hawai'i Loa* clear on 6-Bravo."

"*Hokule'a* clear on 6-Bravo."

Important: If you can't find each other on the agreed channel, always return to the original frequency and wait for traffic to finish.

11088.1 kHz

23329.2 kHz

Trans. Time (UTC) Contents of Transmission

0001-1201	Satellite Imagery (IR)
0017-1217	Pacific Surface Analysis
0041-1241	Tropical Surface Analysis
0601-1801	Satellite Imagery (IR)
0617-1817	Pacific Surface Analysis
0641-1841	Tropical Surface Analysis

Map Area

B	- 55N 130E, 55N 110W, 25S 130E
C	- 30N 120E, 30N 110W, 50S 120E
Disk	- Geostationary Satellite

12 mHz	Stays weak until mid-morning. As sun spot activity increases. After noon, contacts are possible to 4,000 miles
16 mHz	Similar to 12 mHz, except that skip distance and maximum range late in the day can reach 6,000 miles or more.
22 mHz	Normally useless for contacts near the equator. During sun spot periods, this band doesn't open. During high activity, maximum ranges exceeds 8,000 miles. Contacts are possible noon until dusk. Works on north and south paths and dies shortly after dawn.

Notations

- Clarity of transmissions depend on the quality of the ionosphere. Low frequencies to bounce back to earth.
- For sun spot activity, which affects the ionosphere, listen to the radio broadcast.
- All of the above is referring to sky wave transmissions. VLF waves use the ionosphere to bounce back your signal.
- **Important:** The fleet working channels *4-Bravo*, *6-Bravo* are ground wave transmissions. Ground waves hug the surface of the earth approximately 100 to 200 miles out from your transmitter. They are always there, day or night, and does not depend on any particular transmitted signal.

LEGAL CONSIDERATIONS .

IN A DECLARED EMERGENCY, USE ANY FREQUENCY.

- *** In French Polynesia, the KMI and PeaceSat frequencies can be used **ONLY** in international waters. They can **NOT** be used when at anchor or tied up to a dock.
- *** There are only two ways KCCN can legally rebroadcast: via KMI and via PeaceSat.
- *** The KMI frequencies can be used for both personal calls and business.
- *** The PeaceSat frequencies can be used for ship and expedition business.
- *** The standard marine SSB frequencies can be used **only** for ships business.
- *** The HAM frequencies can be used for personal calls by a licensed amateur radio operator. They can **not** be used for ship or expedition business.
